

Secure emails & attachments with intelligent and automatic integration of Egnyte. Leverage powerful rules to scan email content and headers in real time, replace matching messages (or just attachments) with links to Egnyte set with appropriate security levels for each recipient. No end user software or actions required.

The mxHero Advantage

- No additional hardware or software required
- Works for all email systems & clients
- No end user downloads or training
- API for integrating with external data sources

Product Spotlight

- Automatic security & governance of email content
- Intelligent auto-filing to Egnyte based on scanned content
- Complete cloud-based service
- Central control via web based Administration Panel

Intelligent Security

MxHero and Egnyte are a powerful secure email solution. MxHero captures all email in real-time and based on flexible rules can deliver email content directly through secure Egnyte links.

Example usage:

- Detect emails with sensitive information like Social Security numbers and replace with link to an encrypted Egnyte preview.
- Ensure that Egnyte links pasted in email are set to "organization access only" when sent internally.
- Set all attachments sent externally to expire access in 7 days.

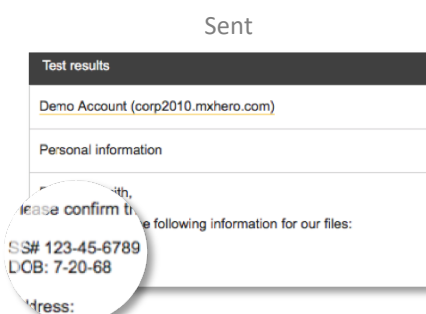

Security with no end user effort

Ideal for companies that need better email security but don't want to depend on user action.

- Health care, finance and legal easily meet HIPAA, FINRA, SOX etc. without concerns around user adoption.

All industries benefit from the additional layer of email security.

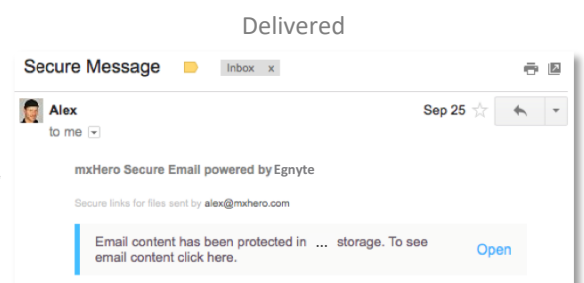

Detect sensitive content in message & attachments for automatic secure delivery

The Power of Egnyte

Leverage all the power of Egnyte:

- Encrypted preview of message & attachments
