

mxHero Mail2Cloud provides intelligent email to Egnyte integration, enabling organizations to better secure, govern and manage their important email content. Ideal for use with cloud services such as Office 365 and GSuite (Google) and on-premises solutions like MS Exchange, it files messages and attachments to Egnyte via an intelligent classification and optimization engine.

The mxHero Advantage

- No hardware or software required
- Works with all email systems - on prem. and cloud (Exchange, O365, GSuite, etc.)
- Works across every device (mobile, desktop, etc.)
- No end user downloads or training
- Outlook add-in for easy drag & drop email to Egnyte
- Seamless & Transparent to end users – no changes to how email is used today

Product Spotlight

- Complete cloud-based service
- Central control via web based Administration Panel
- Transparent capture, security & governance of emails
- Intelligent auto-filing to Egnyte based on email content

Email Security & Governance

Email has no native security and whatever security is added depends on user adoption. A lost device, a hacked email account or a breached email server and people get fired, company's get sued, national politics change course.

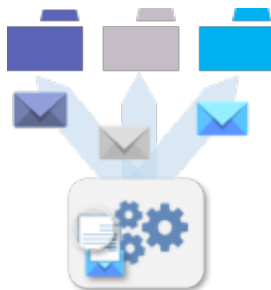

MxHero adds Egnyte security to all your email communications without requiring any change to how users work by transparently replacing attachments with Egnyte links in real-time.

Email Management

At an average of 124 email per day, the business user's mailbox is a busy place. An Inbox that receives every subject, multiple threaded conversations, paperclips representing files is less than ideal for the most important content of your company.

Egnyte is purpose built technology for managing corporate content. MxHero closes the gap by allowing you to easily manage your emails in Egnyte just like you can with documents.

Mailbox Archiving & Thinning

Email archiving is expensive. A typical email is copied many times as it is stored to redundant email servers, backup systems, compliance databases, CRMs, multiple user devices and everyone in copy (Cc'd). Email makes up about 40% of an organizations unstructured data and only grows.

With Egnyte storage and powerful governance features, MxHero can turn Egnyte into a cost effective and compliant email archive. MxHero can also reduce existing mailbox sizes "in-place" by up to 90% by replacing email attachments with secure Egnyte links.

Products & Features

mxHero for Outlook

Save messages & attachments to Egnyte directly from Outlook

- Drag & Drop email to Egnyte
- Embedded Egnyte folder tree
- Favorites and Folder search
- Intelligent filing options
- Supports Outlook versions 2003+
